Close Down Assembly (CDA 3A)

Part No. XBFSC00041

These assemblies are used to “close down” a section between lengths of Sirocco tubing following a centre blow. The assembly, which comprises a length of tube with connectors on either end, is slipped over one piece of tubing before the Sirocco fibre unit is blown in. Having completed the blow in both directions, there will be a short section between the two lengths of tube. The Close Down Assembly is moved across to cover the fibre unit at this point and the connectors tightened up around the tube, completing a protective seal.

Usage – 1 per tube connection. Pack of 10.

Cable & Tube Cutters

Part Nos.

Circumferential Cutters

XBFSC00079 (8 to 28mm diameter) - A

XBFSC00082 (12 to 44mm diameter) - B

Longitudinal Cable Cutter

XBFSC00063 - C

Sirocco Tube Cutter

XBFSC00078 (3 to 8mm diameter) - D

Cable installers will possess their own set of cable cutters which could be used for the preparation of Sirocco cable and tubing. Those identified above and in the photographs alongside are the tools recommended by Prysmian for entering and cutting Sirocco blown fibre tube and the individual tubes.
