- **Career development** opportunities and **Mentorship** programs, based on performance

JOIN OUR GLOBAL NETWORK OF WOMEN IN STEM

We've started our diversity and inclusion efforts a while ago with our "Side by Side" initiative; we believed then and we strongly advocate every day that **people create companies** and its own values and stories. Being a more supportive and inclusive company also means becoming a better and more performing one. This is our

everyday mission for a long-term plan. As a company we have defined targets to achieve by 2030 in the area of social sustainability. One of our goals is to hire and develop +500 women in a fully dedicated STEM program by 2030 and inspire the new generation of women to pursue a career in technical and scientific roles.

DEVELOP YOUR STEM CAREER WITH US

LEAD BY EXAMPLE

Within our STEM IT Program, you will have the opportunity to take on a challenging role and embark on an exciting learning journey! On top of the STEM IT development path, during the first three years you will also grow through customized Women in Leadership

trainings where you will join with your manager and other Women in STEM colleagues. We will support your development through Mentoring and Coaching programs (based on performance) and you will join our global network of **#PrismianWomenInSTEM**.
