

INNOVATION IN ACTION

Installation quality makes the difference.

In high-voltage and complex cable systems, performance doesn't depend only on products. It depends on how they are installed.

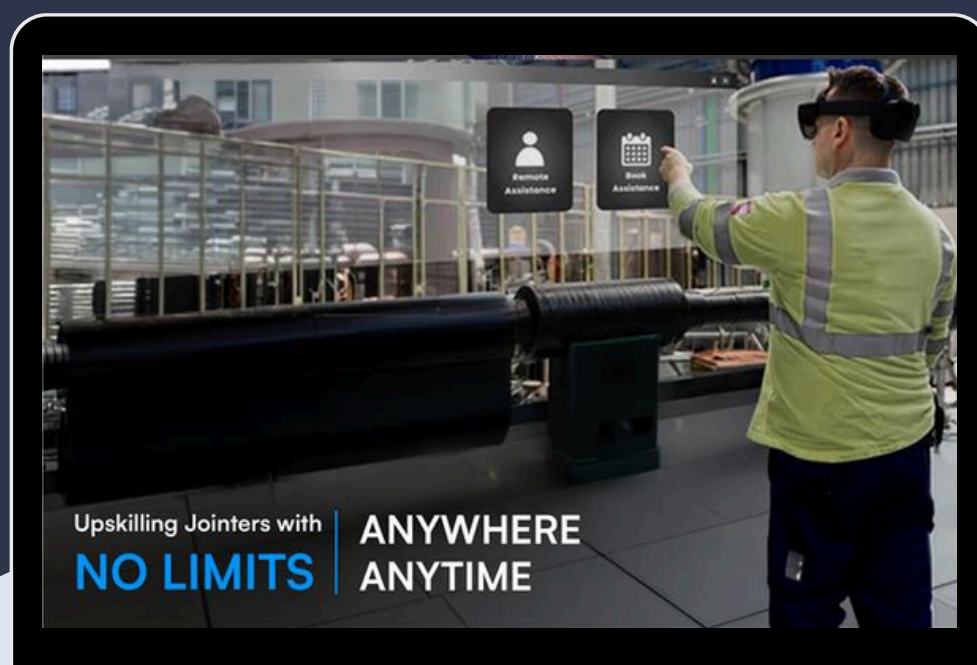

That's why Prysmian has invested in immersive technologies, available offline on Tablet, Desktop PC, and Oculus, and enhanced by internet-enabled remote assistance, designed to ensure consistent, precise and high-quality installations worldwide—independently of location, experience level or site conditions.

What makes Prysmian more competitive?

- Higher installation quality
- Faster, more effective training and jointing time
- Fault reduction & cost savings
- Always available, worldwide
- Sustainability by design
- Remote assistance

Prysmian leads the future of field operations.

From on-site operations to offshore complexity, Prysmian builds a future-ready workforce—skilled, confident, and prepared before challenges arise and supported by real-time remote assistance when needed.
