Protectors

ESP Cable Protector

SPECIALTY: ESP CABLE PROTECTOR

Protectors are designed to ensure that all control lines and cables are protected for the full length of the production string, thus reducing the risk of damage to cable, control line, or flatpacks. PDT's Protector portfolio includes clamping and cable protection solutions to protect cables from lateral, axial, and rotational loading in downhole applications. In addition to our standard cross-coupling range, PDT designs application specific solutions for demanding situations

APPLICATION

Electrical Submersible Pump systems require power cables. ESP Cable Protectors can accommodate round or flat ESP cables. In addition, extra slots in the protector can be added for chemical injection or monitoring.

STANDARDS & APPROVALS

- All parts comply with NACE Standard MR0175 / ISO 15156

QUALITY & TESTING

- Manufactured in accordance with standard Inspection and Quality Test Plans
- Design Validation Testing
 Axial, Lateral, Rotational Testing
- Factory Acceptance Testing
 Visual Inspection
 Make Up / Fit Test
 Dimensional Inspection
 Gap Verification
 Cable Pull test
 Drift Verification
 Torque Test

DESIGN & CONSTRUCTION

- All cast - no welded parts
- One-piece assembly with captive fasteners
- No loose parts
- Interlocking Straps
- Hex or Allen Socket Bolt Option
- Chamfered ends to prevent hang up
- Supports minimum of 40' of ESP cable, downhole cable, control line, and flatpack weight
- Quick and Easy to install
- Reusable
- Custom designs to meet application

Materials

- Carbon Steel
- 316 SS
- 13Cr
- 25Cr
- Super Duplex

Axial Loading

- 30 ton

Lateral Loading

- 30 ton

Rotational Loading

- 3 ton

Common Tubing Sizes

- 2- 3/8" / 2- 7/8" / 3- 1/2" / 4- 1/2" / 5" / 5- 1/2" / 6" / 6- 5/8" / 7"
