Senior Vice President, General Counsel and Corporate
Secretary

Conflict Minerals Report of General Cable Corporation in Accordance with Rule 13p-1 under the Securities Exchange Act of 1934

Introduction

This Conflict Minerals Report (this “Report”) of General Cable Corporation (“General Cable”) for calendar year 2016 has been prepared in accordance with Rule 13p-1 (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended. Please refer to the Rule, Form SD and Release No. 34-67716 issued by the Securities and Exchange Commission (“SEC”) on August 22, 2012 for definitions to the terms used in this Report, unless otherwise defined herein.

SEC adopted the Rule to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain reporting obligations on SEC registrants who manufacture or contract to manufacture products containing conflict minerals that are necessary to the functionality or production of their products. Conflict minerals are defined as cassiterite, columbite-tantalite, gold, wolframite, and their derivatives, which are limited to tin, tantalum, tungsten, and gold (collectively, “3TG metals”) for the purposes of this assessment. The “Covered Countries” for the purposes of the Rule are the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola. These requirements apply to registrants regardless of the geographic origin of the conflict minerals and whether or not they fund armed conflict. General Cable has determined that certain of its operations manufacture, or contract to manufacture products, which contain 3TG metals that are necessary to the functionality or production of such products. As a result, General Cable has implemented policies, procedures, and a due diligence process to determine whether it has sourced any of the 3TG metals contained in its products from the Covered Countries.

Description of General Cable’s Products Covered by this Report

This Report relates to products (i) for which conflict minerals are necessary to the functionality or production of those products, (ii) that were manufactured or contracted for manufacture by General Cable, and (iii) for which the manufacture was completed during calendar year 2016 (the “Covered Products”).

Design of Due Diligence Measures

In accordance with the Rule, General Cable conducted a good faith reasonable country of origin inquiry regarding the 3TG metals contained in the Covered Products. This good faith reasonable country of origin inquiry was reasonably designed to determine whether any of such 3TG metals originated in the Covered Countries and whether any of such 3TG metals may be from recycled or scrap sources. General Cable also undertook due diligence measures to determine the source and chain of custody of necessary conflict minerals used in its products. General Cable’s design of its due diligence program conforms in all material respects with the five step framework established by the Organisation for Economic Co-operation and Development (“OECD”) in its OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Second Edition, 2013 (the “OECD Framework”), an internationally recognized due diligence framework.

General Cable’s due diligence measures were based on the due diligence tools created by the Electronic Industry Citizenship Coalition (“EICC”) and the Global e-Sustainability Initiative’s (“GeSI”) Conflict-Free Sourcing Initiative which includes the Conflict Minerals Reporting Template (“CMRT”), a supply chain survey designed to identify the smelters and refiners of 3TG metals who provide those 3TG metals to General Cable’s suppliers. General Cable is several levels removed from the sources of ores from which 3TG metals contained in the Covered Products are produced and the smelters and refiners that process those ores. General Cable does not make purchases of raw ore or unrefined 3TG metals and makes no purchases in the Covered Countries. General Cable must therefore rely on its suppliers to provide information regarding the origin of the 3TG metals contained in the Covered Products. Moreover,

General Cable believes that the smelters and refiners of the 3TG metals contained in the Covered Products are best situated to identify the sources of such 3TG metals, and therefore has taken steps to identify the applicable smelters and refiners of such 3TG metals in its supply chain.

Due Diligence Measures Performed

General Cable's due diligence measures included, but were not limited to:

Establishing a Conflict Minerals Policy (published at <http://www.generalcablecsr.com/citizenship/conflictminerals.asp>), incorporating the standards set forth in the OECD Framework. Each year, the individuals who administer General Cable's conflict minerals program review this policy to ensure it reflects any changes made by governing bodies and/or General Cable. General Cable requires that suppliers comply with its Conflict Mineral Policy by:

- Establishing their own Conflict Minerals policies and procedures in accordance with the SEC Rules;
- Performing sufficient due diligence into their respective supply chains to determine whether products sold to General Cable contain Conflict Minerals and, if so, whether and to what extent those metals are sourced from conflict-free smelters;
- Reporting to General Cable the results of such due diligence, including identification of the materials or products sold to General Cable and the smelters that produced the relevant Conflict Minerals. General Cable's direct suppliers may have to require successive upstream suppliers to complete the same due diligence until the smelters are identified;
- Committing to being or becoming "conflict-free" so that any Conflict Minerals supplied to General Cable are sourced only from conflict-free smelters;
- Providing information upon request to support General Cable's SEC reporting requirements; and,
- Upon request, provide information to support General Cable's SEC reporting requirements and permit their Conflict Minerals policies and procedures to be audited by General Cable or its representatives.

If a supplier is unwilling to support General Cable in its Conflict Minerals program efforts, General Cable may take remediation steps, up to and including alternative sourcing arrangements. General Cable may also take remediation steps if a supplier cannot determine whether its materials or products contain Conflict Minerals.

Education and training to company personnel. General Cable has conducted training of personnel who have influence over sourcing decisions on conflict mineral awareness. This training allows General Cable personnel to understand General Cable's conflict minerals program.

Incorporating conflict minerals due diligence procedures into assigned roles and responsibilities. General Cable maintains a cross-functional conflict minerals team ("Conflict Minerals Team"), including, but not limited to representatives from legal and supply chain, to direct the execution of its conflict minerals compliance program.

Conducting an internal assessment to identify materials that could contain 3TG metals and suppliers who sourced those materials to General Cable. The Conflict Minerals Team reviews changes in the business to determine if material changes have been made in the way General Cable produce its products and/or if changes have been made in the materials used in its products. When new suppliers are added, the Conflict Minerals Team reviews the suppliers for compliance with its Conflict Minerals Policy. General Cable maintains a compliance helpline whereby employees, suppliers, and other third-parties can report concerns or violations of General Cable's policies. General Cable also maintains an email address (ConflictMinerals@generalcable.com)

for parties to report any questions or concerns related to its Conflict Minerals Policy.

Conducting a survey on General Cable's supply chain to obtain country of origin information for the necessary 3TG metals in General Cable's products using the CMRT as a basis to identify the applicable smelters and refiners and countries of origin of the 3TG metals in General Cable's products. In 2016, General Cable engaged Assent Compliance Inc. ("Assent") to assist with its conflict minerals program. Acting on General Cable's behalf, Assent conducted the supplier survey portion of General Cable's reasonable country of origin inquiry ("RCOI"). The survey employed the CMRT version 4.20 developed by EICC and GeSI. EICC and GeSI developed the CMRT to facilitate general disclosures and information regarding smelters that provide materials to the supplier. It includes questions regarding the supplier's conflict-free sourcing policy, the engagement process with its direct suppliers, and identification of the smelters used by the supplier. Assent contacted non-responsive suppliers to ensure maximum compliance. General Cable received survey responses from 81 of its 95 total, in-scope, suppliers. Survey responses collectively identified 62 suppliers as potentially having 3TG in the products they supply to General Cable.

Results of Due Diligence Measures

During General Cable's due diligence efforts, members of Assent made at least three follow-up inquiries to each "failed" supplier who did not respond to the initial survey, by phone or email. Assent reviewed the responses against criteria developed to determine which required further engagement with General Cable's suppliers. These criteria included incomplete responses as well as inconsistencies within the data reported in the CMRT. Assent worked directly with those suppliers to provide revised responses.

In total, General Cable's suppliers named 7,897 potential smelters or refiners as a result of its survey. Many of the responses received were duplicates. After eliminating all duplicate and invalid responses, General Cable identified 219 individual smelters or refiners that may have supplied 3TGs to its suppliers. See Exhibit A. The vast majority of the responses received provided data at the supplier company level or a division/segment level relative to the supplier, rather than at a level directly relating to a part number that the supplier supplies to General Cable, or were otherwise unable to specify the smelters or refiners used for components supplied to General Cable. General Cable was therefore unable to determine whether any of the 3TG that these suppliers reported were contained in components or parts that the suppliers supplied to General Cable or to validate that any of these smelters or refiners are actually in its supply chain.

For all responses that indicated a smelter, Assent compared the facilities listed to the list of smelters maintained by the Conflict-Free Sourcing Initiative ("CFSI"). If a supplier indicated that the facility was certified as "Conflict-Free," Assent confirmed that the name was listed by CFSI as a certified smelter. As of May 15, 2017, General Cable has validated 162 smelters or refiners and is working to validate the additional smelter/refiner entries from the submitted CMRTs.

Future Due Diligence Measures

In the next compliance period, General Cable will continue to take steps to enhance its due diligence program to mitigate the risk of its necessary conflict minerals contained in the Covered Products to finance or benefit armed groups in the Covered Countries. The steps include but are not limited to:

- Continuing to engage with suppliers to obtain current, accurate and complete information about the supply chain;
 - Continuing to identify alternative suppliers for vendors not responding timely and sufficiently;
 - Continuing to identify alternative sources for conflict minerals materials; and
 - Continuing to provide internal education and training to company personnel.
-

Independent Private Sector Audit

Pursuant to the Rule, an independent private sector audit is not required for this Report.

Forward-Looking Statements

This document contains forward-looking statements within the meaning of the federal securities laws, including statements regarding General Cable's conflict minerals program. Words such as "expects," "intends," "plans," "believes," and "anticipates" and similar expressions are used to identify these forward-looking statements, and which include General Cable's future mitigation actions. These statements are not guarantees of future actions or performance. Actual results and outcomes may materially differ from what may be expressed in such forward-looking statements, which could be affected by, among other things, changes in the Rule, interpretations of the Rule, international due diligence frameworks, law, General Cable's internal allocation of resources or emphasis, customer demands or expectations, and the cooperation of suppliers. General Cable does not intend to update any of the forward-looking statements after the date of this report. These forward-looking statements are made in reliance upon the safe harbor provision of The Private Securities Litigation Reform Act of 1995.

Exhibit A

The information below includes smelter facility names and locations as reported to Assent as of May 15, 2017. However, General Cable cannot confirm which of these smelters, if any, provided 3TG that may be contained in its products, as General Cable is unable to determine the upstream chain of custody of raw materials in General Cable's supply chain.
