

Mining / Tunnelling / Bulk Material Handling Cables

Linking the Future

Prysmian Group is world leader in the energy and telecom cable systems industry.

With almost 140 years of experience, sales exceeding **€11 billion**, **about 30,000 employees** in over 50 countries and 112 plants, the Group is strongly positioned in high-tech markets and offers the widest possible range of **products, services, technologies and know-how**.

It operates in the businesses of **underground** and **submarine** cables and **systems for power transmission and distribution**, of **special cables** for applications in many different industries and of **medium and low voltage** cables for the construction and infrastructure sectors.

For the **telecommunications** industry, the Group manufactures cables and accessories for **voice, video and data transmission**, offering a comprehensive range of **optical fibres, optical and copper cables and connectivity systems**.

Prysmian is a public company, listed on the Italian Stock Exchange in the FTSE MIB index.

Benefits

Prysmian Group's Mining and Tunnelling cables offer significant benefits to a broad variety of specialized mining professionals such as OEMs, specifiers, contractors, installers, mining companies and more. These benefits include:

Unique Mechanical Performance

Prysmian Group's Mining and Tunnelling cables have been designed to withstand extreme conditions in terms of:

- Tensile loads,
- Torsional stresses occurring during misalignment of cable guidance systems and oblique pay out,
- Minimum bending radius at any ambient temperature range and stress conditions,
- High travel speeds and acceleration.

Chemical and Climate Resistance

Prysmian Group's Mining and Tunnelling cables have been designed to withstand the most severe conditions. For these applications Prysmian has developed the high performance compounds that are used in Mining and Tunnelling cables to guarantee resistance to extreme conditions (such as high-speed, oil and fuel, mud, moisture, and acids and basis), as well as to harsh environments (for instance, extreme low/hot temperature, UV irradiation and ozone).

Customised and Multifunctional Engineering

Prysmian designs, compounds and builds cables according to specific customer needs. This allows us to have an exhaustive product range covering all functionalities (MV/LV, Instrumentation and Control, Optical fibres). Prysmian designs multifunctional cables from the simplest to the most sophisticated.

Longer Lifetime

Prysmian Group's Mining and Tunnelling cables guarantee an extended working lifetime (lower failure rate) in comparison with standard and traditional Mining and Tunnelling cables. As a consequence the total cost of ownership is lower.

Miniaturized

Prysmian Group's Mining and Tunnelling cables have the smallest possible dimensions. For instance, in MV cables:

- Dimension - up to 30% less and yet in strict compliance with the existing standards.
- Weight - higher cable performance allowing up to 40% reduction in the cable weight.
- Robustness - higher physical/mechanical resistance, exceeding standard requirements in terms of abrasion, cut-through and repeated bending.

Applications

Mining

Global growth and infrastructure development depends heavily on mined natural resources such as minerals, metal ores, and coal. Open-cut and underground mining operations require an array of powerful electric machines to do the heavy work and minimize emissions. Specialized energy and data transmission systems must provide safe and reliable power in dusty and sometimes explosive environments, and often must withstand high vibration and G-forces. Due to their enormous size and power, mining machines must work continuously in very demanding conditions, and often require voltages up to 36kV.

Tunnelling

Tunnels for highways, railways, and hydroelectric dams are often dug by a very large electric-powered piece of equipment called a “Tunnel Drilling Machine” - also called a TBM or “mole”. When done in hard rock, this type of tunneling is called Mechanized Rock Excavation (MRE). TBMs and MREs require electrical power, as well as compressed air and water for operation and service.

Bulk Material Handling

Although most global trade travels by container, a substantial portion is handled as bulk cargo. Dry bulk cargo facilities process, store, and move a wide range of minerals, ores, agricultural goods, and forest products. Many bulk facilities run 24/7, so the material handling machinery must be heavy-duty, safe, and easy to maintain. Durable and reliable energy and data transmission systems are needed to power stacker / reclaimers, tripper conveyors, ship loaders and unloaders, radial stackers, stack racks, hoppers, and cranes, as well as processing equipment such as crushers and sizers. Electrification must be customized to the type of machine, the application, and the specific material being handled

Our Products and Brands

Product Suitability

	Mining	Tunneling	Bulk Material Handling
Tunnelflex(Std) 0.6/1 kV	X	X	
Tunnelflex-PUR 0.6/1 kV	X	X	
Tunnelflex-R/PUR	X	X	
Tunnelflex MV (No anti twisting protection)- 3.6/6 -12/20kV	X	X	
Tunnelflex MV (Anti twisting protection)- 3.6/6 -12/20kV	X	X	
Panzerflex-ELX MV - 3.6/6 - 12/20kV			X
Panzerflex-ELX MV with fiber optic- 3.6/6 - 12/20kV			X
Panzerflat-ELX MV - 3.6 - 12/20kV	X		X

Festoonflex 0.6/1kV	X		
Custom Design	X	X	X

FG70RPu-TUNNELFLEX-0,6/1kV

MAIN APPLICATION - Mining / Tunneling

Power supply to mobile equipment with high risk of mechanical damage in mining and tunneling. TUNNELFLEX cable is suitable for application where it is deflected in one plane only.
Maximum speed 60 m/min

CONSTRUCTION

Phase Cores Plain copper, flexible class 5 IEC 60228 special construction for mobile application
Conductor:

Insulation: XLPE special compound Brown - Black - Grey

Earth Cores: Plain copper, flexible class 5 according to IEC 60228
Conductor:

Insulation: XLPE special compound colour: yellow/green

Cable Phase cores laid up with earth cores in the interstices
Cores arrangements:

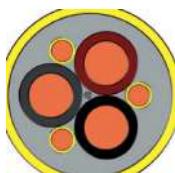

Inner Sheath: PVC flexible special compound

Outer Sheath: Polyurethane special compound abrasion and tear resistant, excellent hydrolysis resistant.
Colour: YELLOW

Marking example: Prysmian Group PALAZZO - TUNNELFLEX 0,6/1 kV 3x..+3x..

PANZERFLEX-ELX MV from 3,6/6 to 12/20 kV

MAIN APPLICATION - Mining / Bulk Material Handling

Flexible H.V. reeling power cables for use on connecting movable parts of machine tools and any material handling equipment (i.e. Stacker/reclaimer, ship to shore crane, container crane, excavators, also suitable for festoon system). Perfectly suitable for any energy supply on cable reels systems associated from high to extreme mechanical stresses, frequent bending/torsional operation and fast movement with strong acceleration.

Conductor:	Tinned copper conductor, flexible cl.5 IEC 60228 Specially designed for mobile application
Insulation:	Micro filtered HEPR rubber compound better than 3GI3 New specially developed compound with improved electrical and mechanical characteristics
Cores identification:	Main cores: natural colour with black semiconductive layer Splitted earth cores: identified by position and covered with special black semiconductive compound
Field control:	- Conductor screen: semiconductive layer - Insulation screen: semiconductive layer of special compound Applied with insulation
Identification:	Printed numbers on semiconductor layer
Laying-up:	Short lay length for better flexibility and mechanical characteristics ≤ 8 times the laying-up cores diameter, three cores design with protective earth cores split in 3 interstitial areas
Separation (if any):	Tape(s)
Inner sheath:	Polychloroprene rubber based compound Special developed with improved mechanical characteristics
Antitwisting protection:	Textile braid of synthetic yarns Firmly bonded between inner and outer sheath
Outer sheath:	Red polychloroprene rubber compound UV resistant, oil and chemical resistant better than 5GM3 compound
Marking:	Prysmian Group PALAZZO - PANZERFLEX-ELX rated voltage nc x cross section year of manufacturing

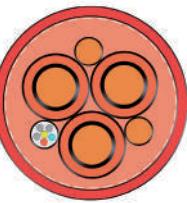

PARAMETERS

ELECTRICAL	Rated voltage Maximum permissible operating voltage in AC systems AC test voltage over 5 minutes	Uo/U = 3,6/6 kV to 12/20 kV* Um = 7,2 kV to 24 kV 11 kV to 29 kV according to VDE 0250 part 813 According to DIN VDE 0298 part 4
	Current Carrying Capacity Simmetrical design + narrow production tolerances	Very low interference
THERMAL	Fully flexible operation Fixed installation Maximum permissible operating temperature of the conductor Short-circuit temperature of the conductor	- 30 °C - 40 °C 90 °C 250 °C
MECHANICAL	Tensile load Minimum bending radii Reeling operation	Up to 20 N/mm ² According to DIN VDE 0298 part 3 No restriction. Consult the manufacturer if speed exceeds 180 m/min
CHEMICAL	Festoon systems Resistance to oil Weather resistance	Up to 120 m/min According to VDE / IEC standard Unrestricted use outdoor and indoor, UV resistant, moisture resistant.

PANZERFLEX-ELX MV + Fiber optic from 3,6/6 to 12/20 kV

MAIN APPLICATION - Mining / Bulk Material Handling

Flexible H.V. reeling combined power and data transmission cables for use on connecting movable parts of machine tools and any material handling equipment (i.e. Stacker/reclaimer, ship to shore crane, container crane, excavators, also suitable for festoon system). Perfectly suitable for any energy supply on cable reels systems associated from high to extreme mechanical stresses, frequent bending/torsional operation and fast movement with strong acceleration.

CONSTRUCTION

Conductor:	Tinned copper conductor, flexible cl.5 IEC 60228 Specially designed for mobile application
Insulation:	Micro filtered HEPR rubber compound better than 3G13 New specially developed compound with improved electrical and mechanical characteristics
Cores identification:	Main cores: natural colour with black semiconductive layer Splitted earth cores: identified by position and covered with special black semiconductive compound
Field control:	- Conductor screen: semiconductive layer - Insulation screen: semiconductive layer of special compound Applied with insulation
Identification:	Printed numbers on semiconductor layer
Laying-up:	Short lay length for better flexibility and mechanical characteristics ≤ 8 times the laying-up cores diameter, three cores design with protective earth cores split in 2 interstitial areas
Separation (if any):	Tape(s)
Inner sheath:	Polychloroprene rubber based compound Special developed with improved mechanical characteristics
Antitwisting protection:	Textile braid of synthetic yarns Firmly bonded between inner and outer sheath
Outer sheath:	Red polychloroprene rubber compound UV resistant, oil and chemical resistant better than 5GM3 compound
Marking:	Prysmian Group PALAZZO - PANZERFLEX-ELX rated voltage nc x cross section, fiber optics n. & type - OPTICAL FIBER year of manufacturing

PARAMETERS

ELECTRICAL	Rated voltage Maximum permissible operating voltage in AC systems AC test voltage over 5 minutes Current Carrying Capacity	Uo/U= 3,6/6 kV to 12/20 kV* Um = 7,2 kV to 24 kV 11 kV to 29 kV according to VDE 0250 part 813 According to DIN VDE 0298 part 4
EMC	Simmetrical design + narrow production tolerances	Very low interference
DATA TRANSMISSION	Fibre-optics for absolute immunity from electrical interferences. Main type: graded index 62,5/125. Available also graded index 50/125 and monomode E9/125 6 (main type), 12, 18 fibre-optics in a structure composed by 6 loose tubes (1, 2 or 3 fibres per tube)	
THERMAL	Fully flexible operation Fixed installation Maximum permissible operating temperature of the conductor Short-circuit temperature of the conductor	- 30 °C - 40 °C 90 °C 250 °C
MECHANICAL	Tensile load Minimum bending radius Reeling operation Festoon systems	Up to 20 N/mm ² According to DIN VDE 0298 part 3 No restriction. Consult the manufacturer if speed exceeds 180 m/min Up to 120 m/min
CHEMICAL	Resistance to oil Weather resistance	According to VDE / IEC standard Unrestricted use outdoor and indoor, UV resistant, moisture resistant.

PANZERFLAT- ELX from 3,6/6 to 12/20 kV

With or without integrated Optical Fibers

MAIN APPLICATION - Mining / Bulk Material Handling

Flexible H.V. reeling combined power with or without data transmission cables for use on connecting movable parts of machine tools and any material handling equipment Suitable for any energy supply on cable reels systems associated from mechanical stresses, frequent bending operation (IN ONE PLANE ONLY) in movement with medium acceleration.

CONSTRUCTION

Conductor:	Tinned copper conductor, flexible cl.5 IEC 60228 Specially designed for mobile application
Insulation:	Micro filtered HEPR rubber compound better than 3G13 New specially developed compound with improved electrical and mechanical characteristics
Cores identification:	Main cores: natural colour with black semiconductive layer. Earth core: - of the same size of main conductor identified by yellow/green colour of insulation - splitted on the main cores
Field control:	- Conductor screen: semiconductive layer - Insulation screen: semiconductive layer of special compound Applied with insulation
Identification:	Printed numbers on semiconductor layer
Metallic screen:	Tinned copper wire braid on phase cores
Cores arrangement:	Parallel Fiber optic module (if any) in the centre
Separation (if any):	Tape(s)
Outer sheath:	Red polychloroprene based compound UV resistant, oil and chemical resistant better than 5GM3 compound
Marking:	Prysmian Group PALAZZO - PANZERFLAT-ELX rated voltage nc x cross section year of manufacturing

PARAMETERS

ELECTRICAL	Rated voltage Maximum permissible operating voltage in AC systems AC test voltage over 5 minutes	Uo/U= 1,8/3 kV to 6/10 kV Um = 3,6 kV to 12 kV 6 kV to 11 kV according to VDE 0250 part 813 According to DIN VDE 0298 part 4
DATA TRANSMISSION (IF ANY)	Fibre-optics for absolute immunity from electrical interferences. Main type: graded index 62,5/125 Available also graded index 50/125 and monomode E9/125	6 , 12, 18 fibre-optics In a structure composed by 6 loose tubes (1,2 or 3 fibres per tube)
THERMAL	Fully flexible operation Fixed installation Maximum permissible operating temperature of the conductor Short-circuit temperature of the conductor	- 30 °C - 40 °C 90 °C 250 °C
MECHANICAL	Tensile load Minimum bending radii Reeling operation	Up to 15 N/mm ² According to DIN VDE 0298 part 3 No restriction. Consult the manufacturer if speed exceeds 180 m/min
CHEMICAL	Resistance to oil Weather resistance	According to VDE / IEC standard Unrestricted use outdoor and indoor, UV resistant, moisture resistant.

PANZERFLEX-L 0,6/1 kV - Power

MAIN APPLICATION - Mining

Flexible power cables for use on connecting movable parts of machine tools and any material handling equipment. (Suitable for any energy supply on cable reels and festoon systems associated to high mechanical stresses, frequent bending/torsional operation and fast movement with strong acceleration.

CONSTRUCTION

Conductor:	Tinned copper conductor, flexible cl.5 IEC 60228 Specially designed for mobile application
Insulation:	HEPR compound better than 3G13 - New specially developed crushproof compound with improved electrical and mechanical characteristics
Cores identification:	Colours according to DIN VDE 0293 part 308 / HD 308 52 Standard colours: <ul style="list-style-type: none">- 1 core: black- 3+3 cores: brown, black, grey + 3 green/yellow- 4 cores: green/yellow, brown, black, grey- 5 cores: green/yellow, blue, brown, black, grey
Laying-up:	Short lay length for better flexibility $\leq 7,5$ times the laying-up cores diameter
Separation (if any):	Tape(s)
Inner sheath:	Polychloroprene rubber based compound Better than GM1b
Antitwisting protection:	Synthetic yarns firmly bonded between inner and outer sheath
Outer sheath:	Black polychloroprene rubber compound UV resistant oil and chemical resistant better than 5GM2
Marking:	Prysmian Group PALAZZO - PANZERFLEX-L 0,6/1 kV nc x cross section

PARAMETERS

ELECTRICAL	Rated voltage Maximum permissible operating voltage in AC systems AC test voltage over 5 minutes Current Carrying Capacity	Uo/U= 0,6/1 kV Um = 1,2 kV 3,5 kV According to DIN VDE 0298 part 4
THERMAL	Fully flexible operation Fixed installation Maximum permissible operating temperature of the conductor Short-circuit temperature of the conductor	- 25 °C - 40 °C 90 °C 250 °C
MECHANICAL	Tensile load Minimum bending radius Reeling operation Festoon systems	Up to 20N/mm ² According to DIN VDE 0298 part 3 No restriction, speed up to 240m/min
CHEMICAL	Resistance to oil Weather resistance	Resistance to oil According to VDE /IEC standard Unrestricted use outdoor and indoor, UV resistant, moisture resistant.

PANZERFLEX-L 0,6/1 kV - Instrumentation and Control

MAIN APPLICATION - Mining

Flexible power cables for use on connecting movable parts of machine tools and any material handling equipment. (Suitable for any energy supply on cable reels and festoon systems associated to high mechanical stresses, frequent bending/torsional operation and fast movement with strong acceleration.

CONSTRUCTION

Conductor:	Tinned copper conductor, flexible cl.5 IEC 60228 Specially designed for mobile application
Insulation:	HEPR compound better than 3GI3 New specially developed crushproof compound with improved electrical and mechanical characteristics
Cores identification:	Black with printed numbers with or without 1 green/yellow Standard: with green/yellow core in the outer layer
Laying-up:	Short lay length for better flexibility ≤7,5 times the laying-up cores diameter in maximum 3 layer
Separation (if any):	Tape(s)
Inner sheath:	Polychloroprene rubber based compound Better than GM1b
Antitwisting protection:	Synthetic yarns Firmly bonded between inner and outer sheath
Outer sheath:	Black polychloroprene rubber compound UV resistant, oil and chemical rsistant better then 5GM2
Marking:	Prysmian Group PALAZZO - PANZERFLEX-L 0,6/1 kV nc x cross section

PARAMETERS

ELECTRICAL	Rated voltage Maximum permissible operating voltage in AC systems AC test voltage over 5 minutes Current Carrying Capacity	Uo/U = 0,6/1 kV Um = 1,2 kV 3,5 kV According to DIN VDE 0298 part 4
THERMAL	Fully flexible operation Fixed installation Maximum permissible operating temperature of the conductor Short-circuit temperature of the conductor	- 25 °C - 40 °C 90 °C 250 °C
MECHANICAL	Tensile load Minimum bending radii Reeling operation	Up to 15 N/mm ² According to DIN VDE 0298 part 3 No restriction. Consult the manufacturer if speed exceeds 180 m/min
CHEMICAL	Festoon systems Resistance to oil Weather resistance	Up to 240 m/min According to VDE / IEC standard Unrestricted use outdoor and indoor, UV resistant, moisture resistant.

FESTOONFLEX-LX 0,6/1 kV - Instrumentation and Control

MAIN APPLICATION - Mining / Bulk Material Handling

Flexible power and cables for use on festoon system and for connecting movable parts of machine tools and any material handling equipment with fast movement strong acceleration and frequent bending during operation.

CONSTRUCTION

Conductor:	Bare copper conductor, flexible cl.5 IEC 60228
Insulation:	EPR compound better than 3GI3 Specially developed crushproof compound with improved electrical and mechanical characteristics
Cores identification:	Colours according to DIN VDE 0293 part 308 / HD 308 S2 Standard colours: - 1 core: black - 3 cores: brown, black, grey - 4G cores: green/yellow, brown, black, grey - 5G cores: green/yellow, blue, brown, black, grey - >5 cores: black with printed numbers + 1 green/yellow
Screen:	For individually screened pairs Made of tinned copper surface covered: approx 80%
Laying-up:	Short lay length for better flexibilty Cores arrangement in maximum 3 layer
Separation (if any):	Tape(s)
Outer sheath:	Black polychloroprene rubber based compound UV resistant, oil and chemical resistant better than 5GM3
Antitwisting protection:	Synthetic yarns Firmly bonded between inner and outer sheath
Outer sheath:	Black polychloroprene rubber compound UV resistant oil and chemical resistant better then 5GM2
Marking:	Prysmian Group PALAZZO - FESTOONFLEX-L 0,6/1 kV nc x cross section

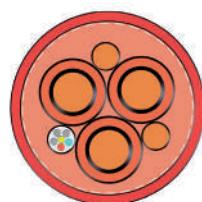

PARAMETERS

ELECTRICAL	Rated voltage	Uo/U= 0,6/1 kV
	Maximum permissible operating voltage in AC systems AC test voltage over 5 minutes	Um = 1,2 kV 3,5 kV - power cores & control 2,5 kV - screened pairs cables According to DIN VDE 0298 part 4
	Current Carrying Capacity	
THERMAL	Fully flexible operation	- 30 °C
	Fixed installation	- 40 °C
	Maximum permissible operating temperature of the conductor	90 °C
	Short-circuit temperature of the conductor	250 °C
MECHANICAL	Tensile load Minimum bending radii Reeling operation Festoon systems	Up to -15N/mm ² According to DIN VDE 0298 part 3 60 m/min Up to 240 m/min
CHEMICAL	Resistance to oil Weather resistance	According to VDE / IEC standard Unrestricted use outdoor and indoor, UV resistant, moisture resistant.

CUSTOM CABLE - Specific Requests

MAIN APPLICATION - Mining / Tunneling / Bulk Material Handling

We understand that in the OEM market it is often difficult to match the application towards pre-defined list of standard cables, therefore we are always open to design and produce products tailored specifically to customer request.

MOST OFTEN USED MATERIALS FOR SPECIFIC CONSTRUCTION REQUESTS:

Conductor:	Bare copper conductor, flexible cl.5 IEC 60228
Insulation:	EPR compound better than 3GI3 Specially developed crushproof compound with improved electrical and mechanical characteristics
Screen:	For individually screened pairs Made of tinned copper surface covered: approx 80%
Laying-up:	Short lay length for better flexibility Cores arrangement in maximum 3 layer
Separation (if any):	Tape(s)
Outer sheath:	Black polychloroprene rubber based compound UV resistant, oil and chemical resistant better than 5GM3
Antitwisting protection:	Synthetic yarns Firmly bonded between inner and outer sheath
Outer sheath:	Black polychloroprene rubber compound UV resistant oil and chemical resistant better than 5GM2
Marking:	Prysmian Group PALAZZO - CUSTOM 0,6/1 kV nc x cross section

For Specific cable requests do not hesitate to contact our sales department or write us on the dedicated request e-mail: cranes.palazzo@prysmiangroup.com
