## Prevention is better than cure

PRY-CAM monitoring systems for cost-effective and highly reliable power grids in industrial applications

# Solutions to demanding industrial challenges

PRY-CAM solutions are specifically designed to tackle power failure challenges, help avoiding unplanned outages and provide real time information about the conditions of power assets.

PRY-CAM, for data-driven power.

Power failures may happen and cause detrimental impacts on businesses and communities: that's a fact.

No matter the cause, either a fault in cabling and equipment or maintenance and repairing activities, each downtime minute translates into reduced direct profits, increased costs, and reputations losses.

PRY-CAM offers a holistic approach to avoid unplanned event.

PRY-CAM solutions are designed to provide **simple** and **clear information** about the status of electrical assets quickly and in an efficient way, to identify where and when a fault will occur, to allow adjusting maintenance schemes based on predictive strategies rather than preventive and to **reduce financial and reputation damages**, accordingly.

All PRY-CAM products feature **robust** and **standardized** enclosures to face the challenges of **industrial applications**.

Each PRY-CAM solution can be configured based on the customers' specific needs in terms of parameters to be monitored to support their specific maintenance and asset management strategies and provide a 360° service.

PRY-CAM solutions are ideal **also for retrofitting** operations as **they do not require power outage** to be installed.

All PRY-CAM devices are maintenance-free and can be connected to a central platform.

PRY-CAM solutions are a powerful preventive tool to **help saving money on direct cost of repair** (no more emergency), **indirect costs** (reduced outage hours), **insurance costs** leading to reduced OPEX and extended CAPEX lifetime.

A Brand of Prysmian Group

### **Advantages**

- Online activity, no service interruption required
- **Easy retrofitting**
- On-site and remote support

## **Targeted Systems**

- Switchgear
- Transformers
- Cables and Cable Accessories
- Generators

### **Industries**

- Renewables, Nuclear, Power Generation
- Data Centres
- All applications with a power grid from 3 kV and above
