

PRYSMIAN AND EDISON ENERGIA SIGN A MULTI-YEAR AGREEMENT FOR THE SUPPLY OF RENEWABLE ENERGY

Milan, 17th March 2025 – Prysmian, global cable solution provider leading the energy transition and digital transformation and Edison Energia, an Edison Group company active in the supply of electricity and gas to businesses and families and value-added services to the retail segment, have signed a multi-year Corporate Power Purchase Agreement (PPA) for the supply of 100% renewable energy. The agreement marks an important step forward in Prysmian's commitment to sustainability and reducing its CO₂ emissions.

Edison Energia will supply Prysmian with approximately 25% of its current annual electricity consumption in Italy. The electricity will be produced by a newly built photovoltaic plant located in Viterbo province, Italy, with a total installed capacity of approximately 150 MWp (Megawatt-peak).

Maria Cristina Bifulco, Chief Investor Relations, Sustainability and Communication Officer at Prysmian, commented: *"This agreement is an important milestone in our journey in reducing our CO₂ emissions. By securing a long-term supply of renewable energy, we are not only enhancing our environmental impact but also benefiting from stable energy costs. This PPA aligns with our broader ESG goals and demonstrates our commitment to leading the energy transition".*

Laura Colli, Chief Purchasing Officer at Prysmian, added: *"This agreement is a key component of Prysmian's sourcing strategy, which emphasizes building partnerships with a sustainable supplier base. By securing clean energy sources, we not only ensure a reliable supply chain but also make a positive impact on the environment, contributing to a greener and more sustainable future for the new generations".*

Massimo Quaglini, CEO of Edison Energia, said: *"The green energy supply agreement signed with Prysmian underlines Edison Energia's commitment to support customers in their decarbonisation journey. We offer our industrial and retail customers both energy produced from renewable sources and our extensive experience as a leading national operator. We focus on quality of service, flexibility and tailor-made contracts. Our goal is to be a trusted partner, leveraging our Group's assets to guide customers towards sustainable consumption with reduced environmental impact."*

**Prysmian**

Prysmian is a global cable solutions provider leading the energy transition and digital transformation. By leveraging its wide geographical footprint and extensive product range, its track record of technological leadership and innovation, and a strong customer base, the company is well-placed to capitalise on its leading positions and win in new, growing markets. Prysmian's business strategy perfectly matches key market drivers by developing resilient, high-performing, sustainable and innovative cable solutions in the segments of Transmission, Power Grid, Electrification and Digital Solutions. Prysmian is a public company listed on the Italian Stock Exchange, with almost 150 years of experience, over 33,000 employees, 107 plants and 27 R&D centres in over 50 countries, and sales of over €17 billion in 2024.

Edison

Edison is a leading energy company, with 140 years of history and records that make it the oldest operator in the sector in Europe. The company employs more than 5,500 people, operating in Italy and Europe in renewable and low-carbon production, natural gas procurement and sales, sustainable mobility, and through Edison Energia and Edison Next in energy, environmental and value-added services for customers, businesses, territories and public administration. The Group is at the forefront of the energy transition challenge, consistent with the UN Sustainable Development Goals and European decarbonization policies. Edison has a highly flexible and efficient power generation fleet, consisting of more than 250 power plants including hydroelectric, wind, solar, and high-efficiency gas-fired combined-cycle thermoelectric plants with a total capacity of about 7.2 GW; and meets the country's LNG and natural gas supply, thanks to a large and highly diversified portfolio of 13 billion cubic meters per year.

Edison Energia

Edison Energia is the Edison Group company dedicated, since the liberalization of the markets, to the sale of electricity and natural gas to end customers. As far as companies are concerned, Edison Energia supplies electricity and natural gas, and related services to Italy's largest energy-intensive companies in the main sectors (steel, ceramics, paper, glass, chemicals, technical gases, rubber), and to large, medium and small manufacturing companies, also through consortia, the service sector and the public administration. In the electricity sector, the company is one of the leading operators in the field of Corporate PPAs, while in the natural gas sector it has been marketing biomethane since 2018, which is also available in liquid form (BioLNG). For households, professionals (with VAT numbers) and small business customers, the company offers a wide range of innovative services in addition to its traditional offers of electricity and gas. For residential customers, the company has expanded its reach by entering the home services sector with solutions that can be tailored to the customer's needs: from energy efficiency products in the home to condominium energy communities. Edison's objective is to propose a sustainable offer tailored to the home and the person.
