

PRESS RELEASE**PRYSMIAN SIGNS CONTRACT FOR THE DELIVERY OF EASTERN GREEN LINK 4**

Milan, February 2, 2026 – Prysmian has signed a contract for the delivery of the Eastern Green Link 4 (EGL4) electrical cable interconnector project with GB transmission owners, SP Energy Networks' transmission business and National Grid Electricity Transmission plc.

Prysmian was selected as the preferred bidder for the project in [September 2025](#).

The contract is worth over €2.3 billion and will now enter Prysmian's backlog of projects.

Eastern Green Link 4 is a new high voltage direct current (HVDC) electrical link that will connect Fife in Scotland with Norfolk in England. It will be able to transmit up to 2GW of clean renewable energy – enough to power around 2 million homes, and is one of five similar projects being developed that will significantly increase the capacity of the electricity network between Scotland and England.

Raul Gil, EVP Transmission at Prysmian, said: "The UK has set the standard for futureproofing its electricity connections. Utilizing the power of undersea HVDC cables to transport power between Scotland and England is a forward-thinking step – and one that many countries are now replicating. Prysmian has been entrusted to support several major HVDC links in the UK, playing a vital part in bringing clean energy to homes and businesses right across the country in a fast and cost-efficient way."

This agreement follows the prior award of the Eastern Green Link 1 project to Prysmian.

Prysmian

Prysmian is a global cable solutions provider leading the energy transition and digital transformation. By leveraging its wide geographical footprint and extensive product range, its track record of technological leadership and innovation, and a strong customer base, the company is well-placed to capitalize on its leading positions and win in new and growing markets. Prysmian's business strategy perfectly matches key market drivers by developing resilient, high-performing, sustainable and innovative cable solutions in the segments of Transmission, Power Grid, Electrification and Digital Solutions. Prysmian is a public company listed on the Italian Stock Exchange, with almost 150 years of experience, over 33,000 employees, 107 plants and 27 R&D centers in over 50 countries, and over €17 billion of revenues in 2024.
